To whom it may concern:

I am writing to introduce myself as a highly dedicated professional successfully pivoting into Front End Development, with a focus on UI/UX design. My decade as a Camera Technician in film instilled a mission-critical attention to detail and expertise in translating complex visual concepts into rigorous technical specifications.

This experience directly informs my work in code. I leverage my visual acuity and system management skills to ensure pixel-perfect design fidelity and efficient workflow management in my projects. I am currently completing the NOROFF Front End Development Vocational School and building proficiency in JavaScript, HTML and CSS, before starting on technologies like Vue and React.

I am actively seeking a junior Front End role where I can apply my unique blend of technical rigor and visual expertise to build exceptional user experiences. Thank you for your time.

Sincerely,

Lars Torp Pettersen
